

Children's Codes Checklist

A handy record of your unique children's codes

For GDPR purposes never use children's names, instead give each child a unique code that they will use for all their Hamish & Milo programmes.

Use this document to record the children in your intervention groups along with their unique child codes used in Navigator. Agree a standard format that works for your school or trust.

Our suggested format: The initials of the child, then the pre-intervention date abbreviated i.e. September 2024 = 924, then finally the year group at pre-intervention date i.e. 6. For example a year 6 child named Luca Smith at starting September 2024 would be : LS9246.
